

As a nurse working 2nd and 3rd shift, I need my sleep. The Indiana "Do Not Call" rule has helped alot. I used to get 5-7 calls a day which interrupted my sleep making it hard for my to concentrate at work. Now I go 2-3 weeks without any calls. As my husband works 1st shift we seldom see each other and with the "Do Not Call" rule we no longer have our time together interrupted my salesmen (or women). If I wanted their products, I would call them myself. Please DO NOT change the rule. Thank You, Jo Walker
